include: spatial association, pattern analysis, scale and zoning, geostatistics, classification, spatial sampling, and spatial econometrics. Fri, 04 Jan 2019 17:07:00 GMT 16 - School of GeoSciences - The Spatial Statistics toolbox contains statistical tools for analyzing spatial distributions, patterns, processes, and relationships. While there may be similarities between spatial and nonspatial (traditional) statistics in terms of concepts and objectives, spatial statistics are unique in that they were developed specifically for use with geographic data.
